

Tool 2.e Links to Australian data

Staff Notes

This tool provides links for you to access external data to give you an overview of the current statistics concerning relationships and sexuality education (RSE). This data will contribute to a comprehensive analysis of your students' relationships and sexuality education needs. Gathering this information helps you create the evidence base for your relationships and sexuality program.

[National Survey of Australian Secondary Students and Sexual Health 2013 \(PDF File 487.6 KB\)](#)

Victorian Women's Health Atlas

Author(s): Women's Health Victoria, in collaboration with other state-wide and regional women's health services.

Subject(s): Women

Description: A tool to assist in the identification of gender impacts on key health areas. The Atlas provides a coordinated State approach to support Women's Health Services and other health planners, to enable comparison between LGAs, Regions and the State. The purpose of the Atlas is to increase the availability of reliable data for evidence based decisions about service design, emerging priorities and program planning.

Publication type: Website

Year of publication: 2014 Note: data is regularly updated

Health Status of Victorians

Author(s): Department of Health & Human Services, State Government of Victoria, Australia

Subject(s): All Victorians

Description: The Department of Health & Human Services collects information about the health status of the Victorian population to inform policy development and assist planning efforts to improve health services. The information collected is used to check and keep a continuous record on the health of the population.
